## Getting to Know Your Child as a Math Student...

Student Name: $\qquad$ Math Hour: $\qquad$
Parent Name (please print)
Parent Signature: $\qquad$
Contact Information: (cell phone, email, etc..)

Please take the time to carefully and honestly answer the questions below. This information will help me get to know and understand who your child is as a person and a learner.

1. Use 3 words to describe your child.
2. What are some of his/her hobbies and interests?
3. How does your child learn best?
4. What have been some success stories, in math, for your child?
5. What are some areas that your child can improve on, in math?
6. Does your child have time set aside each night for homework? If so, please describe. If not, please establish one with your child and describe it below.
7. If your child needs help in math, who is the person he/she will work with or contact?
8. Does your child have access to a computer with INTERNET service on a daily basis?

YES
NO
9. Does your child have a personal device(smart phone, IPAD, Ipod touch, etc) he/she can bring to school to use in class should we have Bring Your Own Device day?

## YES

NO
10. Please share any other information you think will be helpful to us in getting to know your child.

1l. We use MOBY MAX, an online resource, to help support and fill in any gaps in student learning in math from previous years. We typically ask students to complete 40 minutes of Moby each week and we record this as a homework grade. Our data has shown that students who consistently use this program, throughout the year, show growth on their NWEA and in their class. If internet access is not accessible, we suggest going to a neighbors, the library or making arrangements to complete the time during school (lunch, TT, etc). If you absolutely do NOT think any of these are options for your student, please explain why below.

Thank you for sharing this information. This is the first step in getting to know our students and working collaboratively with you. Please plan to attend Open House!
